

## Citizen Advisory Committee Meeting

Tuesday, January 22, 7-9 PM  
Main Street Plaza, Pemberton

### BRING

Sign in Sheet  
Name tags

Paper, pens, post-its, masking tape  
Flipchart & paper  
Handouts  
Large Le Sueur Map  
Water, coffee, snacks, cups, milk, sugar  
(Coffeemaker?)

### BEFORE MEETING

Arrange room in horseshow fashion.  
Set up map and post-its. As people arrive, have them put their name on a post it and place it on a map.

#### 7:00 Introductions

Turn to the person next to you. Talk about: Who you are, where you live, and what is your favorite hobby. What is the story of how your family moved to the watershed? Introduce the person next to you.

#### 7:20 Purpose and Charge of Citizen Advisory Committee (CAC)

Patrick will provide overview of CAC: What we hope to accomplish, timeline, proposed guiding principles, introduce the task ahead.

#### 7:30 Brainstorming - Recommendations to Improve Water Quality

What changes might be needed in order to bring about improvements in water quality in the Le Sueur River Watershed? Make a list of the 10 recommendations that we should pursue.

In April 2013 we'll present a list of recommendations to the larger group.

What makes sense to do? Harvest ideas.

Record and combine. We will see if there are consent items right away.

#### 8:00 Break

#### 8:10 Investigating Science Together - Science Briefing Booklet

What does the science say related to the brainstorming above? Let's learn more about what we agree upon. Hand out the Science Briefing Book. Read from some of it together.

#### 8:30 Discussion

What is already being done?

Who knows someone in the watershed that has done this BMP practice?

Who is already doing something about this issue?

Take Draft Briefing book home with you and review. We're seeking feedback and advice for booklet.

8:50 Arranging Next Meeting

Set next meeting date and time and place together. Find out what works best for the meeting.
